

SUMMARY

Frontend Developer skilled in building high-performance, scalable web applications using React, JavaScript, and modern UI frameworks. Expertise in building dynamic and responsive user interfaces using React, JavaScript, and modern frontend technologies. Proven ability to optimize web performance, integrate APIs, and implement best practices in UI/UX design. Strong problem-solving skills and experience in collaborating with teams to deliver high-quality digital solutions. Actively seeking remote frontend opportunities to drive innovation and enhance user experiences.

EDUCATION

Aptech Computer Education

Diploma in Web Development

TECHNICAL SKILLS

- **Technologies:** JavaScript, React, HTML, CSS, Bootstrap, TailwindCSS, Git, Redux, Context API, RESTful APIs, API Integration & State Management (Hooks, Context API, Redux)
- **Tools:** GitHub, Vercel, Lighthouse, Chrome DevTools, Generative AI Tools, Firebase

KEY STRENGTHS

- Problem-Solving, Analytical and observational skills
- Performance Optimization & UI Enhancement
- Effective Team Collaboration & Communication, Time Management
- Continuous Learning & Adaptability

ONLINE PRESENCE

Let's Connect!

I am actively seeking remote frontend developer roles to contribute to innovative projects and create seamless digital experiences. Let's connect! Reach out via GitHub or email for collaborations or opportunities.

PROFESSIONAL EXPERIENCE

Frontend Developer | React Developer | JavaScript Developer

- Developed multiple high-performance frontend applications, including e-commerce platforms and real-time interactive web applications.
- Built dynamic, mobile-responsive web pages optimized for speed and accessibility.
- Integrated RESTful APIs for seamless data synchronization and improved user interaction.
- Applied best practices in UI/UX, ensuring cross-browser compatibility and accessibility.
- Collaborated with clients to translate business requirements into intuitive digital experiences.

Highlighted Projects

Flickster – Movie & TV Shows Platform

- Advanced Content Discovery: Genre filtering, live search, movie overviews, and release dates for easy exploration.
- User-Centric Customization: Light/dark mode toggle for a personalized experience.
- Responsive, Modern UI: Sleek, mobile-first design with horizontal sliders to showcase trending content, optimized for all screen sizes.
- Real-Time Data Integration: Integrated TMDB API for fast, real-time movie data with seamless performance.
- **Technologies:** React, JavaScript, CSS, TMDB API

E-Commerce Platform

- Developed a full-fledged e-commerce platform featuring product filtering, shopping cart functionality, and an intuitive checkout process.
- Integrated APIs for dynamic product updates and enhanced user experience.
- Reduced page load time by 40% (measured using Lighthouse) by optimizing React rendering, lazy loading, and asset compression
- **Technologies:** React, JavaScript, Bootstrap
